Line Coupler with Data Secure (SCN-LK001.03)

Splitting a KNX installation into several areas and lines increases fail-safety and extends the maximum number of bus devices. Lines or areas are electrically isolated from each other.

Properties

- Supports KNX Data Secure (from ETS 5.7.2)
- Application as an area/line coupler for connecting two KNX bus segments
- Application as a line amplifier
- Fail-safe due to galvanic isolation of the lines
  (Separate bus power supply required for subline)
- Filter function to reduce bus load
- Supports extended group addresses
